

PROF NASIMA MH CARRIM

SIOPSA President 2024/2025

Greetings SIOPSA members and visitors,

As President for the term 2024/2025, I hope this message finds you well. Our strategic focus for 2024/2025 is on fostering relationships, value-add for our members and growing talent through building fluid IOP professional identities. As we continue our journey together, I am reminded of the importance of fostering relationships both within and outside our community. These collaborative efforts are founded on mutual respect and networking both nationally and internationally and are the cornerstone of our society's success.

Our shared goal is to create an environment where every interaction and initiative brings a value add to our members. Whether through networking opportunities, professional development, or community service, we strive to enhance the experience and benefits for everyone involved. Our growth mindset is aimed at developing the talents of both future and current IOPs in the field with the aim of enabling IOPs to develop and cultivate their professional skills.

Together, by fostering relationships, focusing on value-add initiatives and promoting an environment of a growth mindset, we can achieve remarkable things. I look forward to seeing the positive impact we will make in the coming months.

Thank you for your continued support and dedication to SIOPSA's strategy.

Best,

Prof Nasima MH Carrim
President, SIOPSA 2024/2025
